Hitachi Washing Machine Freestanding

Intelligent Series

The Art of Ease

Product Code BD-120XKVEADM1

Lorem ipsum

Intelligent cleaning for busy lives

Intelligent Wash

With this intelligent combination of load detection, sensor-based analysis, automatic dosing, and adaptive movement, the washing machine delivers a truly optimized wash cycle every time. It ensures perfect cleaning, efficient resource use, and maximum fabric care, so your clothes look and feel their best—wash after wash.

The dirt and rinse sensors are designed to optimize the washing process by detecting the level of soil on your load during the Auto Program cycle. The dirt sensor measures the amount of dirt or soil in the wash water and adjusts the wash time, water usage and detergent levels to ensure optimal cleaning. The rinse sensor detects how clean the water is during the rinse cycle and ensures that clothes are thoroughly rinsed without excess detergent left behind meaning your clothes are cleaned to perfection.

A glowing blue circular graphic with the text "Efficient Inverter Motor" in the center.

Efficient Inverter Motor

Inverter Motor

Hitachi Washing Machines with inverter motor technology provide high efficiency, high durability, and low noise levels. Inverter motors outperform non-inverter motors by 25%*.

2 Button Start

Australia has introduced an updated safety requirement for washing machines. Starting the washing cycle now requires a deliberate two-button start process, designed to reduce the risk of unintentional operation.

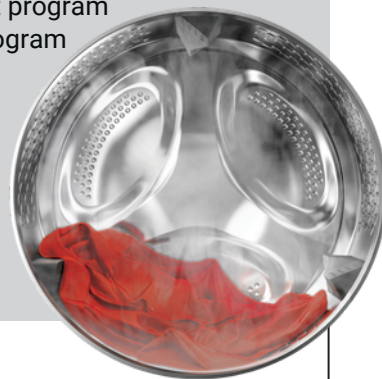

Hygiene Program

The program works by releasing the steam from the bottom of the washing machine's drum, right before it even starts washing. Creating a pre-treatment to loosen up stubborn stains, dirt, and other gunk in your garments.

Refreshing Steam Program

Refreshing Steam is a short program for 1kg dry clothes. This program makes your ironing duties easier while also refreshing the odour on your clothes.

Wifi Connectivity

Control your laundry remotely. Control and monitor your Hitachi washing machine from anywhere with Homewhiz; a smart home application that provides a professional assistant to make your life easier!

Aquastop

Protect your laundry from flooding with Aquastop safety valve installed on your washing machine.

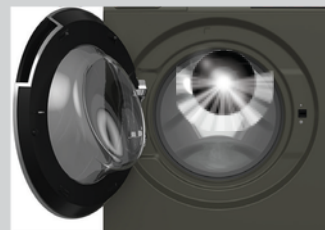

Tub Clean

Keep your washing machine performing well with the Tub Clean function. Use regularly to look after your washing machine.

Drum Light

Hitachi's interior LED light makes loading and unloading your laundry easier; by lighting up the inside of the drum, it helps you easily spot those smaller items that may get left behind.
