## Hitachi Original Vacuum Compartment

### Vacuum-sealed for Freshness

Platinum Catalyst with Ruthenium Vacuum Compartment

The secret to longer-lasting freshness is reduced oxygen levels.

Hitachi's original preservation extracts air to maintain approx. 0.8 atm of vacuum preservation. With unique Platinum Catalyst, chilled meat, fish and dairy products are kept fresh and nutritious, and ready. This zone has 2 separate temperature controls: approx -1°C and approx 1°C

**Retain Nutrients and Flavour**  
Suitable temperature for flavour & texture

**Retains Moisture**  
Prevents dryness without wrapping

**Quick Seasoning**  
Enhances faster seasoning absorption

## Sensor Cooling & Spot Powerful Cooling

The sensor detects temperature changes and adjusts the cooling power to maintain the 2°C temperature in the right lower compartment.\* Use Spot Powerful Cooling for one-touch quick cooling.

\*1 Factory setting will be Moisture Cooling "ON". When the Moisture Cooling is ON, the total power consumption is increased by approx.5%.

\*2 For when the room temperature is stable and the room temperature is approx. 32. \* Tested by Hitachi. Moisture Cooling is not applicable for door pockets.

\*3 Approximately 400 g of leaf salad (without wrap) stored for 24 hours. Room temperature about 20, no door open/close. The humidity inside the cabinet is the average humidity of the shelf space. Humidity depends on the amount of storage in the refrigerator compartment, the food (type, condition, and amount of food), the number of times the refrigerator door is open/close, and the operating conditions.\* Tested by Hitachi. The effect may differ depending on conditions and the amount of food stored.

\*Tested by Hitachi. The effect may differ depending on conditions and amount of food stored.

# Aero-care Vege Compartment

The uniquely-designed compartment sustains freshness and nutrients of the vegetables and fruits with Platinum Catalyst.

Ethylene gas, released by fruits and vegetables to aid in the ripening process, can lead to over-ripening and can spoil their freshness. Hitachi's Platinum Catalyst technology has the ability to decompose the ethylene gas and convert it into carbon dioxide gas, delaying spoilage by making fruits and vegetables dormant to extend their freshness.

## Delicious Freeze (Quick Freeze)\*

### Aluminium Tray and Sensor Helps Automatically Delicious Freeze

When the Temperature Sensor above the Delicious Freeze Tray detects food that is not frozen, settings automatically adjust to freeze food quickly to reduce ice crystal formation. This minimises dripping by reducing ice crystal size, sealing in flavors.

\* Tested by Hitachi. When storing approx. 1.7kg of vegetables in the Aero-care Vege Compartment (Lower case) at a room temperature of approx. 20 for 10 days without wrapping or opening/closing the door, the humidity inside the refrigerator will be 68-95%. Humidity varies depending on the amount and type of food being stored, freshness, and operating conditions of the refrigerator. Effects may differ depending on the type, state and the amount of vegetables.

\* Tested by Hitachi.

One Door Opens with a Touch

Both Doors Open with the Slide of your finger

Open Drawers with the Touch of a Button

## Easy Open Auto Doors and Drawers

Auto Door Technology provides a delightfully-easy door opening experience like never before. Even if the refrigerator and freezer are fully packed, doors & drawers can be opened automatically with a touch or slide of a button.

## Flex Freeze

Organize Your Freezer Storage Space.

**Delicious Freeze Tray** : For stocking flat items & home freezing items.

**Mid Case** : For stocking frequently used items & leftovers.

**Bottom Case** : For stocking up bulk bought frozen foods & large items.

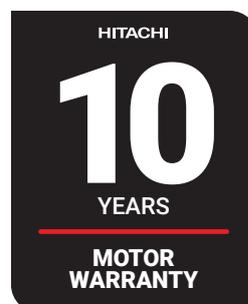

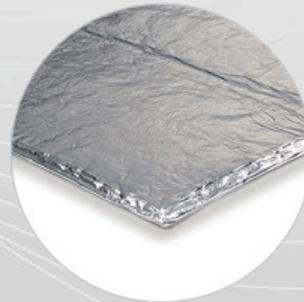

**Vertical Freeze Space**

## Energy Saving Technology VIP\*

### Vacuum Insulation Panel

VIP is a thin vacuum-insulated panel with extremely high heat insulation performance. This can reduce the thickness of insulation and keep the thermal conductivity low.

\* The position number and shape of the VIPs used vary depending on the model.  
\* Images are for illustrative purposes only.

# Specification

Model		R-ZX740RA X	R-ZX740RA XK
Type		French Door Multi Drawer	French Door Multi Drawer
Capacity	Total Volume (L)	735	735
	Freezer Volume (L)	312	312
	Fresh Food /Vegetable Volume (L)	386 / 137	386 / 137
General / Performance	Colour	Mirror Glass	Black Glass
	Cooling System	Dual Fan Cooling	Dual Fan Cooling
	Energy Rating	4 Star	4 Star
	Energy Consumption at 32°C (kwh/year)	440	440
	Climate Class	T	T
	Efficient Inverter Compressor	●	●
