The Art of Ease

Vacuum-sealed for Food Freshness

Hitachi's Original Vacuum Compartment

The secret to longer-lasting freshness is reduced oxygen levels. Hitachi's original vacuum preservation extracts air to maintain approx. 0.8 atm (atmospheric pressure). The meat, fish and dairy products are kept fresh and nutritious, and ready to cook without defrosting.

Refreshing Technology Maintains 0.8 atm Vacuum*6

Hitachi innovation at its finest and most consistent: the sealed pressure-resistant vacuum realises and maintains the vacuumed environment. A vacuum pump extracts air and reduces oxygen to achieve approx. 0.8 atm (atmospheric pressure) throughout.

Nutrition Retention

Stay healthy. A vacuumed environment prevents oxidation and retains nutrients inside the food.

DHA Value in Mackerel Stored after 3 Days*1

Tested and Report by Suranaree University of Technology*2

Vitamin C Value in Pineapples Stored after 3 Days*3

Tested and Report by Suranaree University of Technology*2

Vitamin C Value in Papaya Stored after 7 Days*3

Tested and Report by Suranaree University of Technology*2

Quick Seasoning

Quick seasoning is made possible because the compartment removes air from stored food, enabling seasoning to be absorbed at a faster rate. So, with less time required for seasoning and cooking, such as for marinated seasoning or dehydrating the dried items, there's more time for eating!

Optimal Preservation

Preserves your various type of foods in optimal condition.

A Tale of 2 Temperature Zones

Now, you can truly chill. Store your food without freezing by selecting a suitable temperature for the stored items, and help prevent deterioration of flavours and texture.

Freshness Preservation

Excellent preservation of original flavour and texture, by keeping them fresh without getting frozen, and hydrated without the need for troublesome wrapping.*7

Moisture Retention Level

Enjoy Fresh Raw Food (Sashimi)!

K-Value in Raw Tuna Stored after 7 Days*8

Vacuum Compartment : 27.8%
(Vacuum Sub Zero Mode: Approx. -1°C)

Refrigerator Compartment : 35.8%
Initial Value : 8.8%

Enjoy Fresh Food!

K-Value in Chicken Breast after 7 Days*8

Vacuum Compartment : 46.9%
(Vacuum Sub Zero Mode: Approx. -1°C)

Refrigerator Compartment : 52.3%
Initial Value : 44.0%

Flavour Preservation

Excellent preservation of original flavour and texture, by minimising the drips while keeping them fresh without getting frozen and hydrated without the need for troublesome wrapping.

*1 Tested Model : R-X7300F. The effect may differ depending on types or freshness of food stored. This effect does not extend to best-before and expiration dates, and does not guarantee the indicated shelf life.
*2 Tested by The Center for Scientific and Technological Equipment, Suranaree University of Technology under the rules, conditions and test results at the time of testing and analysis. Graph data calculated by Hitachi.
*3 Tested Model : R-M80VAGGD9X. The effect may differ depending on types or freshness of food stored. This effect does not extend to best-before and expiration dates, and does not guarantee the indicated shelf life.
*4 Tested by Hitachi.
*5 Tested by Hitachi. Tested Model : R-S38JV. The effect may differ depending on types or freshness of food stored.
*6 Vacuum means the space where the pressure is lower than the atmospheric pressure. The pressure in the Vacuum Compartment is about 0.8 atm, which is lower than the atmospheric pressure, hence, Hitachi considers this a vacuum.
*7 Tested by Hitachi. Tested model : R-S38JV.
*8 Tested by Hitachi. Tested Model : R-WB64VGD0. K-value is an indication of freshness. The lower the value, the fresher the item. K-value of 60% or higher is not suitable for eating raw and consumption. The effect may differ depending on types or freshness of food stored, and does not extend to best-before and expiration dates.
*9 Tested by Hitachi. Tested Model : R-WB64VGD0. The effect may differ depending on types or freshness of food stored, and does not extend to best-before and expiration dates.

Flexible Storage Selectable Zone

The Selectable Zone feature allows you to customise mode settings based on your storage and lifestyle needs.

Cook instantly without the need to defrost with Soft Freeze -3°C

Easy Cutting
Softly frozen foods are easy to slice.

Easy to Prepare Portions
Just take the amount that is needed.

Cook Immediately
Cook without the need to defrost the food.

Fresh Vegetables with Organised Storage

Separate Vegetable Compartments

For long-lasting freshness, each of the cases maintains the moisture of the food at the optimal level of approx. 90%* with indirect cooling. And the completely separate compartments are always full of clean air with no transferred odours thanks to the Triple Power Filter.

*Tested by Hitachi. Differs depending on the amount and type of vegetables.

Optimal Storage

Select Case (Dry Food - Vegetable)

Select based on your storage needs. Ideal for preserving dry food or vegetable.

Breakthrough Energy Saving*2

INVERTER × Dual Fan Cooling

*1

Provides optimal cooling in both the freezer and refrigerator compartments, something a single fan cannot do. Improved Dual Fan Cooling with dedicated fans for each compartment ensures powerful cooling. This is supported by the Eco Thermo-Sensor in each compartment that detects any temperature change separately to enable the ideal temperature change to be maintained in each of the compartments at all times.

Energy Saving*2

The Eco Thermo-sensor and Inverter Compressor control the amount of chilled air to be delivered to each compartment.

Stabiliser Free*2 130V-300V

Even without a special stabiliser, Hitachi's inverter refrigerator can operate under wide voltage fluctuations from 130V-300V.

Long Cool Keeper*2 15 Hours

The temperature in the freezer compartment is maintained to keep food fresh in the event of a power cut, for up to 15 hours.

Customise mode settings based on your storage and lifestyle needs

Freezer -18°C to -20°C

Ice Cream & Frozen Items

Wish to separate your frozen savoury food from your ice cream and ice? Now you can with an additional storage option of the Freezer setting.

Soft Freeze -3°C

Meat & Fish

Choose the Soft Freeze setting to keep meat and fish fresh; you can easily cook them instantly without the need to defrost.

Chill/Meat 1°C

Dairy & Meat

Keep your dairy, meat and fresh food in ideal 1°C in the Chill/Meat setting.

Refrigerator 3°C

Drinks & Foods

Running out of space for your drinks and food? You can now have extra storage refrigerator space at 3°C.

Other Features

Powerful Deodorisation

Triple Power Filter

Triple Power Filter removes odour components*3 and removes bacteria on the filter by 99%.*4

Big yet Easy to Use

The often-used refrigerator compartment is positioned at the top for easy use and offers a wide field of vision. Even with a lot of food stored, with the neat storage compartment, a glance is all you need to see everything, so it's easy to put in and take out items.

*1 Image is for illustrative purposes only.

*2 Tested by Hitachi. Operating conditions may differ depending on situations and specifications.

*3 Triple Power Filter that catches and removes 7 odour components (Tested by Hitachi. The type of odours : Methyl Mercaptan, Ammonia, Acetaldehyde, Trimethylamine, Propanal, Hexanal and Acetic Acid).

*4 Also provides a sterilising effect. Combining the properties of Activated Carbon, Zeolite and Manganese Oxide (catalyst), the filter greatly reduces the percentage of odours present over time. Testing organisation : Boken Quality Evaluation Institute. Testing method : Film adhesion method (JISZ2801). Name of processing component : Filter. Sterilisation method : Application of oxidation catalyst to filter. Subject : Bacteria trapped in filter. Test results : 99% sterilised after 24 hours, achieved using the filter alone. No effect on the environment and food inside the refrigerator.

Clean Ice Automatically Made for You

Ice cubes are made automatically and continuously by simply filling the tank with water. When you want to make ice quickly, switch the Quick Freezing mode ON. This will make ice approx. 22%⁵ faster.

Quick Cooling

When you want to cool items quicker and powerfully, switch the Quick Cooling mode ON. This cools items approx. 30%⁶ faster.

Premium Design

Designed with luxury in mind, aluminium is used for the interior back panel for a touch of elegance and comes with an energy-saving wide bright ceiling LED light. Sleek refined flat doors with recess handles, seamlessly blends into your home interior for an elegant harmonious look.

Designed for Convenience

Touch Screen Controller

Flat glass panel controls let you change the settings with a simple touch. And a wipe is all it takes to clean the tempered glass surface.

Efficient Inverter Compressor

10 years warranty

Hitachi refrigerators use an energy-efficient, electronically controlled inverter compressor. The compressor provides powerful cooling and lowers noise.

Flexible Temperatures for Your Storage Needs

The Selectable Zone feature allows you to customise mode settings based on your storage and lifestyle needs.

Surround Air Cooling

The air circulation system blows less direct cold air on the food inside the whole fridge. No Frost cooling system optimizes the cold air distribution inside the refrigerator. Cool air comes from the sides of the sleek designed backwall and surrounds the shelves more equally. Surround Air Cooling keeps the food under a gentle air flow.

Energy Saving*

The Eco Thermo-sensor and Inverter Compressor control the amount of chilled air to be delivered to each compartment.

*Tested by Hitachi. Operating conditions may differ depending on situations and specifications

Touch Screen Controller

Flat panel controls let you change the settings with a simple touch. And a wipe is all it takes to clean the surface.

*6 Tested by Hitachi. Comparison between Quick Cooling mode ON and OFF. Based on French Bottom Freezer Deluxe 645L model.

Dual Sensing Control

Hitachi refrigerators have two Eco Thermo-Sensors, one in the freezer compartment and the other in the refrigerator compartment. The sensors detect any temperature changes separately to enable the ideal temperatures to be maintained in each of the compartments at all times.

VIP – Vacuum Insulation Panel Technology

VIP is a thin panel with a very fine glass fiber vacuum inside, giving an extremely high heat insulation performance - much higher than that of Urethane, a conventional insulation material. It prevents external heat from entering to achieve exceptional energy savings.

Illuminated LED Lighting

LED in Refrigerator and Freezer Compartments. Energy saving anti-glare LED lights have been used not only in fresh food compartment but also freezer compartments.

Metal Backwall Design

Designed with luxury in mind, aluminum is used for the interior back panel for a touch of elegance.
