"My favourite functions of our Hitachi home appliances have seamlessly integrated into our lifestyle. For someone who cooks at least thrice a week, I need a multi-purpose fuss-free oven. A budget-friendly refrigerator with a large capacity is also necessary. Lastly, our washing machine's auto self-clean and water-saving modes put it above other competing models."

Alex,
owner of Hitachi Refrigerator,
Washing Machine &
Microwave Oven.

Refrigerator

Enjoy the best and freshest food this festive season with Hitachi Made in Japan Refrigerators. Equipped with proprietary Japanese technology to help maintain freshness of stored food.

Vacuum Compartment with Platinum Catalyst and Ruthenium

The secret to longer-lasting freshness is reduced oxygen levels. At an ideal atmospheric pressure of 0.8ATM that resembles that of Mount Fuji, the Vacuum Preservation with unique Platinum Catalyst extracts air and reduces oxygen to keep chilled meat, fish and dairy products fresh, nutritious and ready to cook.

Aero-care Vege Compartment with Platinum Catalyst

The uniquely-designed compartment sustains freshness and nutrients of the vegetables and fruits with Platinum Catalyst. In addition, the improved airtight seal of compartment increases and controls humidity.

IoT (Smartphone App)

Manage your refrigerator right from your smartphone. From the condition of your refrigerator, to food management to include expiry dates of groceries, and even door alarm to alert you when the door is left open, stay connected wherever you are.

Scan and watch how Platinum Catalyst retains food freshness and nutrients in both Vacuum and Aero-care Vege Compartments.

Looking for the perfect Refrigerator for your home? Scan here to hear it from the interior designer!

Inverter X Dual Fan Cooling

Provides optimum cooling in both the freezer and refrigerator compartments, something a single fan can't do. Improved Dual Fan Cooling with dedicated fans for each compartment ensures energy saving and powerful cooling.

Dual Sensing Control

Two Eco Thermo-Sensors, one in the freezer and the other in the refrigerator compartment. The sensors detect any temperature change separately to enable the ideal temperatures to be maintained in each compartment.

High Power Inverter Compressor

Capable for providing exceptionally powerful cooling by generating a large volume of chilled air, as well as efficient low power cooling with microcomputer control.

Compressor

Washing Machine

Hitachi's efficient, powerful and energy-saving Washing Machines are designed with innovative technologies to ensure you have fresh linen, upholstery and laundry this holiday season.

Auto Dosing System (ADS)

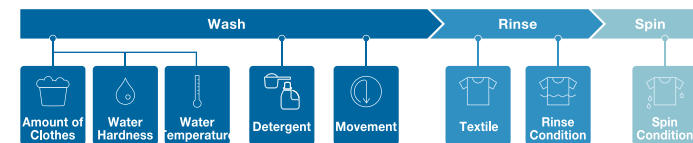

Wash clothing effortlessly with Auto Dosing System. This smart dispenser measures and adds the proper amount of detergent to the wash according to the amount of clothing for an exceptionally clean finish.

Wind Iron

The Wind Iron technology smoothens out wrinkles after washing and drying, all thanks to its big drum that allows clothes to move freely, and Jet Fan Motor that generates high-speed airflow of 300km/h. With light and gentle finishing, clothes can now be worn directly once out from the drum.

AI Wash

AI Wash automatically determines the washing method and time depending on various washing conditions. You can do your laundry smartly and cleanly without detailed settings required.

"One thing that we were quite particular about was where the washer was manufactured. The Hitachi Washer is manufactured in Japan, which is perfect because Japan is well-known for reliable products."

Yan Liang, owner of Hitachi Made in Japan Washing Machine and Refrigerator.

Looking for the right Washing Machine for a cozy home? Scan here for three golden tips!

Auto Self Clean

With the Auto Self Clean function, 99% of all germs accumulated in the tub can be removed, preventing mould growth after each wash.

Scan and watch how the Hitachi washing machine automatically cleans itself.

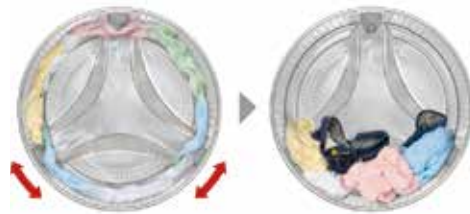

Powered Inverter

With a Smart Control feature, the Power Inverter is able to conserve energy by detecting and controlling the tub and pulsator rotation speed for washing small and large loads.

Tangle-Free

With the tangle-free feature, clothes can be taken out of the drum easily with minimal tangling, resulting in fewer wrinkles after spin-drying.

Air Purifier

Rejuvenate the air within your home for your family and guests this festive, with Hitachi's Made in Japan Air Purifiers.

Carbon dioxide levels can be reduced, cleansing the air and providing better oxygen circulation for you and your loved ones. Allergens (such as dust and pet odour) and harmful smoke (such as cigarette smoke) can be eliminated too, reducing chances of diseases and allergic reactions.

Allergen-Free HEPA Filter

With an average 10 years' life-span, the HEPA Filter collects 99.97%*¹ or more dust containing fine particles, ensuring the air around you is clean.

Captures particles as small as 0.02µm

The sealed filtration system with Antimicrobial Allergen-free HEPA Filter captures 90% of ultrafine particles as small as 0.02µm*².

PM2.5 Sensor

The sensor allows the Air Purifier to switch to high-sensitivity detection mode and purifies dust with max air flow operation, and is much quicker than the normal automatic air purification mode.

*¹HEPA Filter traps 99.97% or more dust containing fine particles of 0.3µm at a rated air flow. Based on performance of a single HEPA Filter complying with the JIS Z 8122. Overall room dust removal performance may differ. *² Tested by Institute of Energy and Environmental Technology e.V. (IUTA). Test method: According to DIN 71460 / ISO 11155. Test results: Collects 90% fine particles of 0.02µm.

Scan to find out more about the Air Purifiers that enable you to have clean air all year round.

Rice Cooker

Complete your festive feast with authentic fragrant rice made with Hitachi Rice Cookers.

Steam Recycling Technology

This mechanism prevents steam evaporation from escaping, maintaining the rice moisture level within the Rice Cooker. The recycled steam is then delivered automatically at regular intervals to keep the rice warm and soft for up to 24 hours.

Induction Heating Technology

The Induction Heating (IH) produces magnetic forces that generate heat in the pot itself to yield rice that is fluffy and has a uniform texture and delicious taste.

Double Cook

The Double Cook mode helps cook meals more deliciously, effortlessly and efficiently, by reusing the steam and heat generated from cooking rice, to cook food in the Double Cook Basket.

"We have been using our trusty and lasting Hitachi Rice Cooker for the past 6 years without any issues. It comes with lots of functions and is really easy to clean. Just the right size for our family and I use it to cook a variety of different rice, food, soups and even cakes. Hitachi will definitely be at the top of my mind if we do consider a change of home appliances!"

Felicia,
owner of Hitachi Rice Cooker.

Microwave Oven

Impress your guests this festive season with your culinary skills with Hitachi's Microwave Ovens. Assembled with technology and innovation that effectively reduce excess fats, salts and calories, these Ovens can reheat food that tastes fresh and healthy.

Healthy Cooking

Select a healthier cooking option with the Superheated Steam mode, using a large volume of over 100°C - steam inside the oven to reduce fat and salt content in food.

Smart W Sensor

Automatically controls the heating power and cooking time by double-scanning the weight of the food and the food surface temperature*. While the 8-eyed centre infrared sensor swings 15 levels (120 divisions) to detect the surface of the food, the Triple Weight Sensor uses a 3-point measuring system to weigh the food.

*Measures the weight of the food (including dishes), the temperature and the temperature changes from before cooking to the prescribed temperatures of each menu.

Quick Auto Menus

Enjoy cooking in just 10 minutes* with the oven quick auto menus. The Smart W Sensor controls the heating power by automatically scanning the amount of the food inside the oven. This allows quicker cooking times and the convenience of cooking small side dishes.

*Excludes pre-cooking time.
