"My favourite functions of our Hitachi home appliances have seamlessly integrated into our lifestyle. For someone who cooks at least thrice a week, I need a multi-purpose fuss-free oven. A budget-friendly refrigerator with a large capacity is also necessary. Lastly, our washing machine's auto self-clean and water-saving modes put it above other competing models."

Alex,
 owner of Hitachi Refrigerator,
 Washing Machine & Microwave Oven.

*Special bundle must be purchased at one location. Delivery strictly to one address. ^Including Handle.

Refrigerator

Enjoy the best and freshest food with Hitachi Made in Japan Refrigerators. Equipped with proprietary Japanese technology to help maintain freshness of stored food.

Vacuum Compartment with Platinum Catalyst and Ruthenium

The secret to longer-lasting freshness is reduced oxygen levels. At an ideal atmospheric pressure of 0.8ATM that resembles that of Mount Fuji, the Vacuum Preservation with unique Platinum Catalyst extracts air and reduces oxygen to keep chilled meat, fish and dairy products fresh, nutritious and ready to cook.

Flexible Storage

Match your lifestyle and needs with the Selectable Zone feature. It allows customisation of the mode setting for each of the lower compartments to be set as refrigerator, vegetable or freezer.

IoT

Manage your refrigerator right from your smartphone. From the condition of your refrigerator, to food management to include expiry dates of groceries, and even door alarm to alert you when the door is left open, stay connected wherever you are.

"Functionality and convenience were our top priorities. Our fridge is energy-efficient as it comes with 6 doors, one of which is made just for storing ice-cream. I was completely sold on the handy auto ice-maker. I just need to fill up the tank and it makes ice for me. No more water spillage and I'll never run out of ice!"

Xin Ling,
owner of Hitachi
Made in Japan Refrigerator.

Washing Machine

Hitachi's efficient, powerful and energy-saving Washing Machines are designed with innovative technologies to ensure fresh laundry always.

Wind Iron

The Wind Iron technology smoothens out wrinkles after washing and drying, all thanks to its big drum that allows clothes to move freely, and Jet Fan Motor that generates high-speed airflow of 300km/h³. With light and gentle finishing, clothes can now be worn directly once out from the drum.

Ultra-Stream Wash

The Ultra-Stream Wash uses a powerful circulation pump, resulting in highly concentrated detergent to penetrate deep into the fabric, creating an outstanding white finish on clothes while conserving water. The Wash works hand-in-hand with the X-Shaped Pulsator, sending laundry through continuous pressing, beating and rubbing motions, ensuring a thorough cleaning process.

Ultra-Stream Rinse

The Ultra-Stream Rinse function circulates plenty of water, producing strong centrifugal forces with its high-speed rotation, working through dirt and detergent hidden in fibres.

"One thing that we were quite particular about was where the washer was manufactured. The Hitachi Washer is manufactured in Japan, which is perfect because Japan is well-known for reliable products."

Yan Liang,
owner of Hitachi Made in Japan
Washing Machine and Refrigerator.

Auto Self Clean

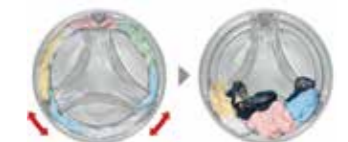

With the Auto Self Clean function, 99% of all germs accumulated in the tub can be removed, preventing mould growth after each wash.

Powered Inverter

With a Smart Control feature, the Power Inverter is able to conserve energy by detecting and controlling the tub and pulsator rotation speed for washing small and large loads.

Tangle-Free

With the tangle-free feature, clothes can be taken out of the drum easily with minimal tangling, resulting in fewer wrinkles after spin-drying.

Air Purifier

Rejuvenate the air within your home with Hitachi's Made in Japan Air Purifiers.

Carbon dioxide levels can be reduced, cleansing the air and providing better oxygen circulation for you and your loved ones. Allergens (such as dust and pet odour) and harmful smoke (such as cigarette smoke) can be eliminated too, reducing chances of diseases and allergic reactions.

Allergen-Free HEPA Filter

With an average 10 years' life-span, the HEPA Filter collects 99.97%*1 or more dust containing fine particles, ensuring the air around you is clean.

Captures particles as small as 0.02µm

The sealed filtration system with Antimicrobial Allergen-free HEPA Filter captures 90% of ultrafine particles as small as 0.02µm*2.

PM2.5 Sensor

The sensor allows the Air Purifier to switch to high-sensitivity detection mode and purifies dust with max air flow operation, and is much quicker than the normal automatic air purification mode.

*1HEPA Filter traps 99.97% or more dust containing fine particles of 0.3µm at a rated air flow. Based on performance of a single HEPA Filter complying with the JIS Z 8122. Overall room dust removal performance may differ. *2Tested by Institute of Energy and Environmental Technology e.V. (IUTA). Test method: According to DIN 71460 / ISO 11155. Test results: Collects 90% fine particles of 0.02µm.

Scan to find out more about the Air Purifiers that enable you to have clean air all year round.

*Compared to Automatic Mode. #Compared to Silent Mode.

Rice Cooker

Satiate your appetite with delicious cooked rice made with Hitachi Rice Cooker.

Steam Recycling Technology

This mechanism prevents steam evaporation from escaping, maintaining the rice moisture level within the Rice Cooker. The recycled steam is then delivered automatically at regular intervals to keep the rice warm and soft for up to 24 hours.

Induction Heating Technology

The Induction Heating (IH) produces magnetic forces that generate heat in the pot itself to yield rice that is fluffy and has a uniform texture and delicious taste.

Double Cook

The Double Cook mode helps cook meals more deliciously, effortlessly and efficiently, by reusing the steam and heat generated from cooking rice, to cook food in the Double Cook Basket.

"When running a day-to-day F&B business, the most crucial thing is the consistency of the quality of food served. Hitachi's Made in Japan Rice Cooker provides good quality and consistency of rice with a perfect texture."

Mr Liong Tieu Chiong, owner of Kimoto Gastro Bar.

"We have been using our trusty and lasting Hitachi Rice Cooker for the past 6 years without any issues. It comes with lots of functions and is really easy to clean. Just the right size for our family and I use it to cook a variety of different rice, food, soups and even cakes. Hitachi will definitely be at the top of my mind if we do consider a change of home appliances!"

Felicia, owner of Hitachi Rice Cooker.

Microwave Oven

Impress your family and friends with your culinary skills with Hitachi's Made in Japan Microwave Ovens. Assembled with technology and innovation that effectively reduce excess fats, salts and calories, these Ovens can reheat food that tastes fresh and healthy.

Auto Bakery

With up to 21 preset menus, bread baking has never been easier. The Convection Oven function produces rich flavours and soft fluffy breads in just 90 minutes.

Auto Modes

With up to 200 preset menus, Hitachi's Made in Japan Microwave Oven optimises cooking to suit every cooking style.

Healthy Cooking

Healthier cooking is now possible with the Superheated Steam mode. It uses over 100°C of steam inside the oven heater to reduce fat and salt content in food, keeping the taste uncompromised.

"With a young child who enjoys healthy food options and a father-in-law who loves baking bread from home, the Hitachi Made in Japan Microwave Oven allows my family to have the best of both worlds!"

Asyiah, owner of Hitachi Made in Japan Microwave Oven, Refrigerator & Rice Cooker

Vacuum Cleaner

Keep your home clean and spotless with Hitachi's Vacuum Cleaners. With meticulously-designed details – from the specially-engineered pipe and hose for superior operation and mobility, to the combination of multi-angle head and zoom pipe that provides access to seemingly impossible corners.

Multiple Tools for Various Cleaning

- ① Powerful Smart Head
- ② Lightweight Carbon Extension Pipe
- ③ Two-way Crevice Nozzle
- ④ Mini Power Head
- ⑤ Smart Hose
- ⑥ Broom Brush
- ⑦ Handy Brush

Zero Distance to Wall

You can clean the floor even right to the edges thanks to the head structure.

Detachable Lithium-ion Battery

Detach easily and allows you to use another fully charged battery.*

*Additional battery is optional.

"I chose the Allergy Care model because of its Electric Linen Beat Head which can be used to clean beddings by capturing allergens and dust effectively. I use it to clean my daughter's bed, and this has helped to prevent her from sneezing."

Mr Lewis Tan & Family, owner of Hitachi Made in Japan Vacuum Cleaner, Refrigerator and Superheated Steam Microwave Oven.
